AI & DATA TRANSFORMATION FOR SCALES BUSINESS ANALYST DATA SCIENTIST

(206) 387 6998 | nkhang.work@gmail.com | My Portfolio

ABOUT ME/ PROFILE SUMMARY

I am currently pursuing a degree in **Data Science** at **Seattle Pacific University**, building hands-on expertise in **R, Python, machine learning, and data visualization** across multiple projects involving **large-scale datasets** and AI model training from real-world data. Alongside my studies, I have been working as a **Business Analyst**, where I gather and analyze data, identify **business processes and rules**, and translate complex information into **logical, practical solutions** that enhance **productivity** and **drive return on investment**. That experience gave me something most data science students do not have: **the ability to sit between the technical and the business side, understand what the organization actually needs, and communicate data insights in a way that leads to real, strategic decisions**. Applying **Agile principles** and a mindset of continuous learning, I bring both **analytical rigor** and **business fluency** to turn data into outcomes that genuinely move the needle.

AREA OF EXPERTISE

Business Acumen	Data Analysis	Agile Project Execution
Business Process & Rules Mapping	Logic System Design & Translation	ROI & Financial Impact Assessment
Basic Machine Learning	Data Visualization	Statistic & Modeling

KEY ACHIEVEMENTS

- **F2Tech Asia, www.f2tech.asia (2025):** Led the **end-to-end development** of an **AI and data management system** for a **multi-location F&B chain** and a **large-scale event venue**. Utilized **low-code platforms** and **AI automation** to **optimize operations, streamline data workflows, and enhance customer engagement**. The new system helped the company **achieve 1.5× revenue growth & securing two new large firm customers**.
- DataFest (2026):** Won **Best Data Visualization**; collaborated in a team to analyze **20M+ records across multiple raw datasets**, building **regression models** and delivering **insights** through structured dashboard and **advanced visualizations** in **R and Python**, identifying key opportunities to improve **patient journey efficiency**.
- **Temporary Administrative Assistant(2023-2024):**Processed and managed student documentation with accuracy, ensuring compliance with institutional procedures prior to submission to Human Resources. Served as a primary point of contact for students, addressing inquiries related to paperwork requirements and administrative processes. Coordinated cross-departmental communication to facilitate the timely review and approval of student records. Leveraged Microsoft Office Suite (Excel, Word) to organize, track, and maintain administrative records efficiently

PROFESSIONAL EXPERIENCES

F2TECH ASIA, Vietnam - Business Analyst Intern	June 2025 - Sep 2025
- Business Acumen & ROI Assessment – Engaged with clients to define business objectives, align digital transformation goals with market opportunities, and evaluate financial returns; contributed to winning two new customers and achieving 3× revenue growth. - Data Analysis & Business Process Mapping – Collected and analyzed operational data, identified performance gaps, and documented business objects, workflows, and decision rules to support process optimization and automation. - Agile Project Execution – Collaborated with cross-functional teams in sprint planning, backlog management, and testing; ensured the AI & data management system for an F&B chain and an event venue was delivered on time and within budget. - Logic System Design & Translation – Translated conceptual business processes into logical system designs using low-code platforms and AI tools, accelerating deployment and improving operational efficiency.	

EDUCATION

- **Highline College** - AS Track II in Computer Science **Sep 2022 - Aug 2024**
- **Seattle Pacific University** - Bachelor in Data Science **Sep 2024 - Current**
